

COAL, GAS, OIL.... KEEP IT IN THE SOIL!

NO! YES!

to climate
change,
to system
change

Corporations are relentlessly cooking the climate, wiping out life on earth, and driving us off the cliff to ecological collapse. Can this be stopped? Can our capitalist economic system be made to respect humans and the environment? Is there an alternative to capitalism?

Public Forum with Richard Smith

University lecturer, member of the 'System Change Not Climate Change' network in New York City, author of many articles including '*Capitalism and the destruction of life on the planet: Six theses to save the humans*'. His forthcoming book: '*To Save the Humans, Turn the World Upside Down*'.
